

This questionnaire probes your reactions to the products described in the presentation that you just observed. Your ratings and comments will remain anonymous in this part of the session, except for a brief discussion of only three areas - B2 & B3 and D. Please respond to all statements and questions, even if you only have a slight opinion.

## SECTION A. RATING

Circle the letter that best represents your opinion. Use the scale below to rate each of the following statements:

<b>Scale:</b> <b>Y = Yes</b> <b>N = No</b> <b>? = Not sure/ no opinion</b>
--

**Circle only one for each question**

- |  |          |          |          |
|--|----------|----------|----------|
| 1. My organization is or has been a Velocity customer.   | <b>Y</b> | <b>N</b> | <b>?</b> |
| 2. I feel that I clearly understand the products that were described.                                      | <b>Y</b> | <b>N</b> | <b>?</b> |
| 3. I generally like the products that were described and feel they would provide value to my organization. | <b>Y</b> | <b>N</b> | <b>?</b> |
| 4. My organization would consider purchasing the described products.                                       | <b>Y</b> | <b>N</b> | <b>?</b> |

## SECTION B. CHOICE

Check the choice that best fits your situation for each statement.

- I think that my organization would prefer to (check  $\checkmark$  one):
  - Collect information internally using a software package such as Velocity's
  - Hire someone like Velocity to provide the full service data collection, analysis and reporting
  - I am not certain what my organization would prefer to do
- I think that my organization would prefer (check  $\checkmark$  one): \*(we will discuss this)
  - Standardized data collection survey tools
  - Proprietary (custom) data collection survey tools
  - Both
  - I don't know what my organization would prefer to do
- I think that my organization would prefer (check  $\checkmark$  one): \*(we will discuss this)
  - Acute* condition-specific functional status monitoring
  - Chronic* condition-specific functional status monitoring
  - Both - no preference to one or the other
  - I don't know what my organization would prefer to do

Are there any *specific conditions* for which functional status monitoring products should be developed? If so, please list:

---
